Exploratory Research: Is the Indian Audience ready for this category's taste?

★☆☆☆☆ **Disappointed**

Reviewed in India on 20 August 2025

Verified Purchase

Sorry to say but all the flavours of this soda taste very artificial, and more like a cough syrup than an actual refreshing drink.

★☆☆☆☆ **Pathetic taste**

Reviewed in India on 20 August 2025

Verified Purchase

Saw its ad and ordered it with excitement..But what was even the taste!? Worst taste...tried all 3 but didn't like any of them. Still 3 are lying on my fridge! Waste of money. Worst i've ever tried.

★★☆☆☆ **Not that great or orangey**

Reviewed in India on 13 September 2025

I purchased Orange Cream Soda and the taste was disappointing. There is no taste and it tastes anything like orange or even soda but like a medicine. Would not buy again!

Just Like Japan Learned Coffee, India Can Learn Functional Taste

STRATEGIC PLAYBOOK

01

Set Expectations

Use **"Acquire a Taste"** framing to manage the palate shock of prebiotic ingredients vs sugar.

FRAMING

02

Consistency Builds Trust

Deliver a reliable flavor profile every time to convert curiosity into a long-term habit.

RELIABILITY

03

Reduce Remorse

Eliminate the anxiety of the "Health vs Taste" trade-off. Validate the choice instantly.

PSYCHOLOGY

04

Simplify Choice

Position Quenzy as the default "No Brainer" option to reduce decision fatigue.

SIMPLICITY

INSPIRATION

Nestlé Japan

The Coffee Revolution

THE CONTEXT

Japan was a tea-drinking nation. Consumers didn't have a "taste" for coffee.

THE STRATEGY

They didn't sell "bitter coffee." They sold **sweets & desserts** infused with coffee flavor, building a consistent, positive association over time.

> *Simplifying choice and building familiarity eases decision fatigue and creates culture.*

Mass Messaging and Taste Fit

DON'T CHOOSE, DRINK QUENZY.

- This messaging appeals to the masses, who may not understand words such as fibre, functional but who are inclined to try a new healthy drink amongst many choices. ***"Don't Choose, Drink Quenzy"*** implies not making a choice between health and a soda and takes away buyer's remorse while making Quenzy synonymous with healthy beverage choices.

IT'S NOT HEALTHY, IT'S QUENZY.

- "**Acquire a taste for health**" as messaging helps managing expectations of the consumer, indicating that the taste may not be what they expect but is necessary for health. It is similar to acquiring a taste for beer and wine over time. This is a unique observation which other players are not leaning into.

BRAND STRATEGY

Messaging Framework

Three strategic pillars to simplify choice and build habit

Don't ~~Choose.~~

DRINK QUENZY.

SIMPLICITY IS THE ULTIMATE SOPHISTICATION

01

THE PHILOSOPHY

"Don't Choose, Drink Quenzy"

Liberation from the Trade-off.
Consumers feel stuck between "healthy & boring" vs. "tasty & guilty." We remove the burden of choice.

"Why decide? Have both."

02

THE MINDSET

"Acquire a Taste for Health"

Managing Expectations.
Honest communication that functional health is a journey. Like wine or dark chocolate, the palate adapts.

"A better you tastes different."

03

THE PROOF

Good Gut, No Guilt

- Zero Added Sugar
- 5g Prebiotic Fiber
- < 15 Calories / Can

"Science you can sip."
