

PREMIUM COMMERCE

PERFORMANCE ECOSYSTEM

NIKE APP INDIA

FROM PREMIUM COMMERCE TO PERSONALISED PERFORMANCE ECOSYSTEM

Presented by Akshay Sinha

A STRATEGIC PRODUCT TEARDOWN & OPPORTUNITY ANALYSIS

THE BATTLEGROUND IS THE PREMIUM YOUTH SEGMENT.

500M+

Urban Youth Target Addressable (18–35).

The Demographic Gap.

~12%

Premium Segment CAGR (India) — Nike's Core Battleground.

This demographic expects more than a store; they expect a digital ecosystem that matches their lifestyle.

NIKE INDIA HAS MASTERED THE TRANSACTION. IT HAS MISSED THE ATHLETE.

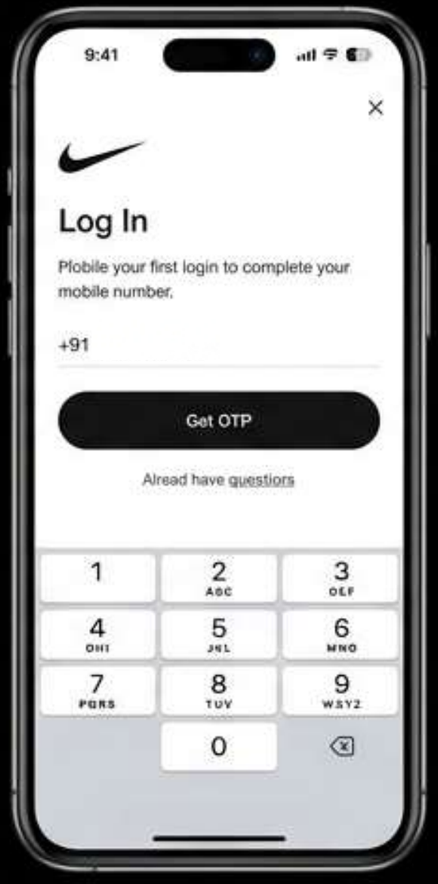

THE CURIENT JOURNEY: THE TRANSACTIONAL LOOP

POST-PURCHASE ENGAGEMENT: NEAR-ZERO.
ORDER CONFIRMATION IS THE LAST TOUCHPOINT.

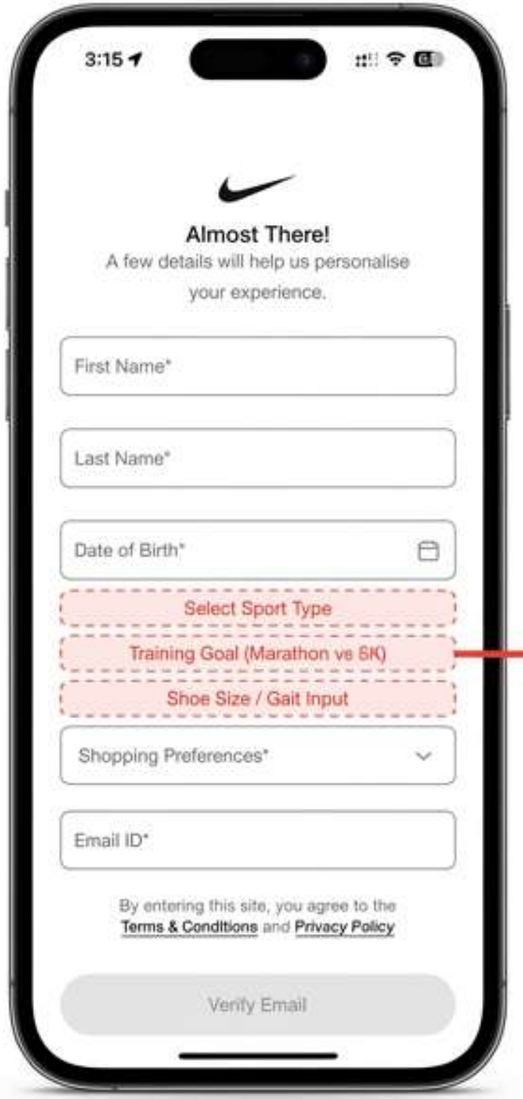

ENTRY IS FRICTIONLESS. WORLD-CLASS UTILITY.

Smooth Checkout: Low-friction payment flow with OTP-based auth reduces drop-off.

Verdict: The infrastructure is solid. The door is open.

ONBOARDING: THE MISSED CONNECTION

CRITICAL DATA GAP:
We ask for a birthday, but not a sport.

TO THE APP, THE ATHLETE IS JUST A DEMOGRAPHIC.

```
ID: Akshay Sinha
Sex: Male
DOB: 2000
Interest: Mens
```

What the App Sees

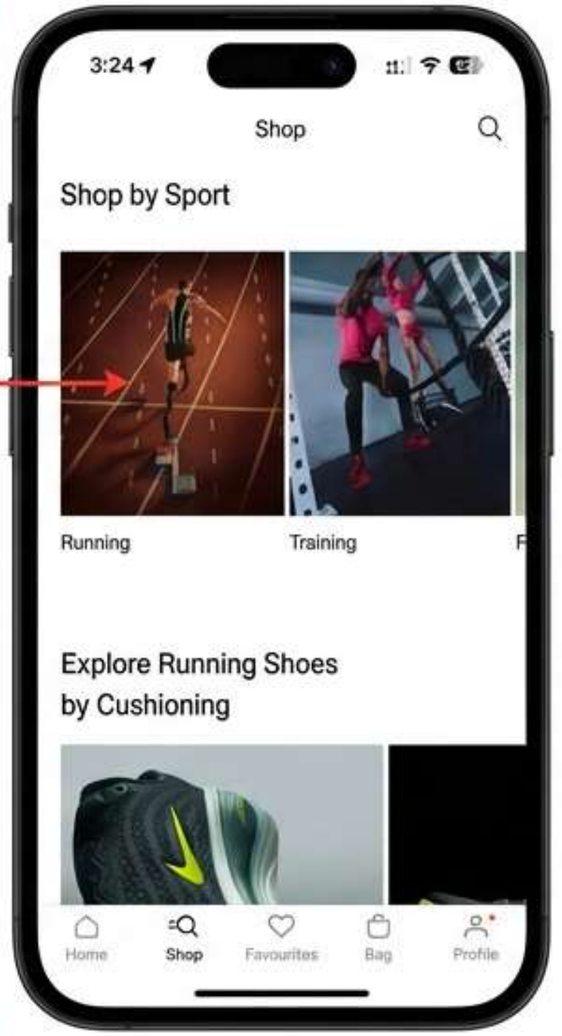

Who the User Is

VERDICT: The app fails to see the athlete.

DISCOVERY: THE BLIND FEED.

Sorted by Category, not Capability (Sprint vs. Marathon).

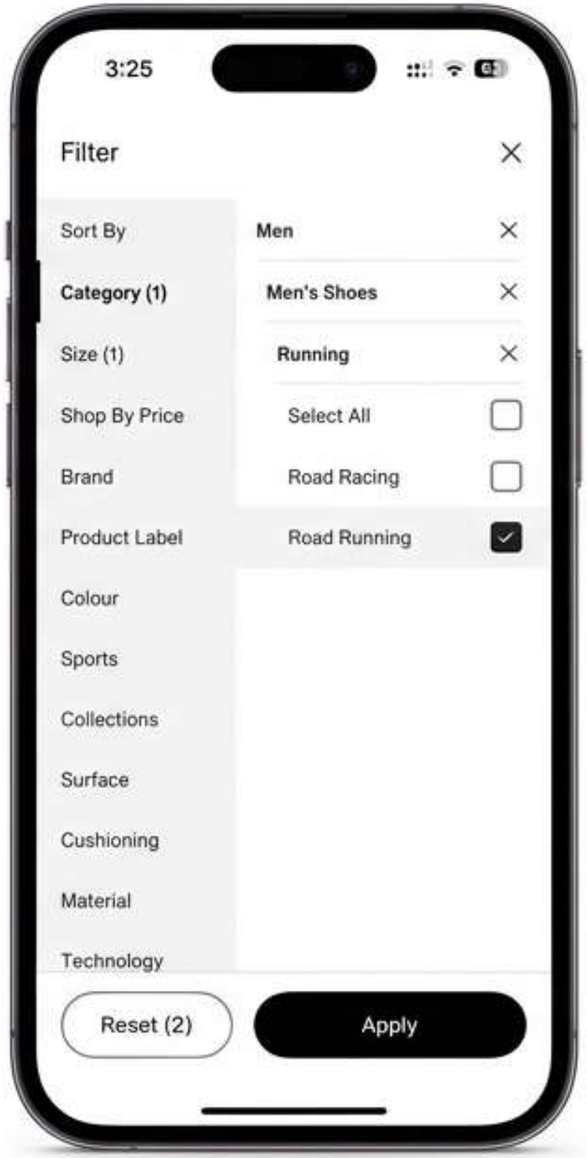

Generic ‘New’ drops. No relevance to user’s training cycle.

STATIC CONTENT

SELECTION: SEARCHING BY LABEL, NOT LOGIC.

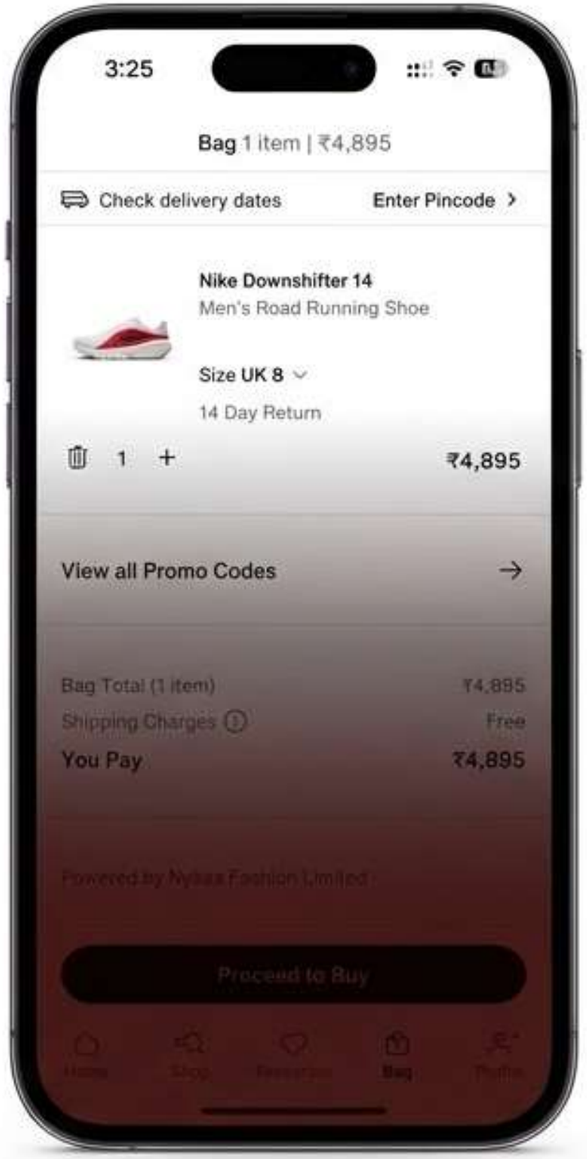

THE MISSING INTELLIGENCE

- NO Match Score (Gait fit)
- NO Usage Context (Recovery vs. Race Day)
- NO Technical Specs Filter

The user is forced to research outside the app because the app does not act as a coach.

CHECKOUT: THE DEAD END.

The relationship ends the moment money leaves the wallet.

- **Missing: "Add to Gear Locker", "Start Mileage Tracking".**

THE UX SCORECARD

✓ WHAT WORKS (The Container)	✗ WHAT DOESN'T (The Content)
✓ Premium UI/UX	✗ No Performance Onboarding
✓ High-Quality Visuals	✗ No Adaptive Recommendations
✓ Smooth Checkout	✗ No Training Integration
✓ Brand Storytelling	✗ No Usage Tracking

SUMMARY: A PREMIUM SHELL WITH A TRANSACTIONAL CORE.

ONE APP, THREE IGNORED PERSONAS

THE URBAN RUNNER

Needs: Gear coaching

THE SNEAKERHEAD

Needs: Exclusive access

THE GYM PRO

Needs: Smart replenishment

CURRENT APP EXPERIENCE

Highlights lack of differentiation

THE CORE STRATEGIC GAP.

PREMIUM COMMERCE

Nike sells gear.

- Drops,
- GMV,
- Sales.

Nike India sells gear. It does not yet know how you use it.

PERFORMANCE ECOSYSTEM

Nike knows usage.

- Coaching,
- Mileage,
- Impact.

THE PERSONALISATION PLAYBOOK.

3 Pillars to shift from premium retail to performance ecosystem.

01

ACQUIRE

Athlete Onboarding Engine.

02

ENGAGE

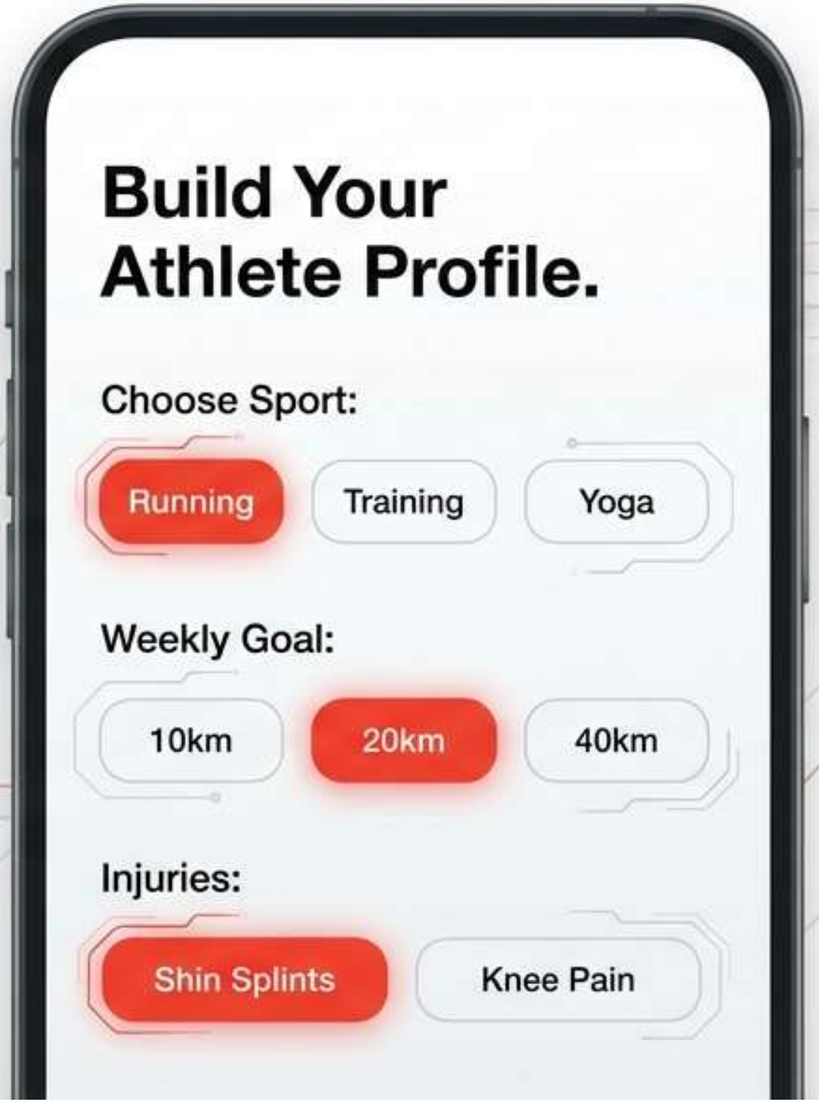

Adaptive Recommendation Layer.

03

RETAIN

Post-Purchase Lifecycle Loop.

PILLAR 1: THE ATHLETE ONBOARDING ENGINE.

STRATEGY

Profile-first signup.
Know the athlete before
you sell to them.

PILLAR 2: ADAPTIVE INTELLIGENCE.

STRATEGY

Recommendations driven by **metrics**, not just category browsing.

PILLAR 3: THE LIFECYCLE LOOP.

STRATEGY

Mileage tracking →
Replenishment →
Loyalty lock-in.

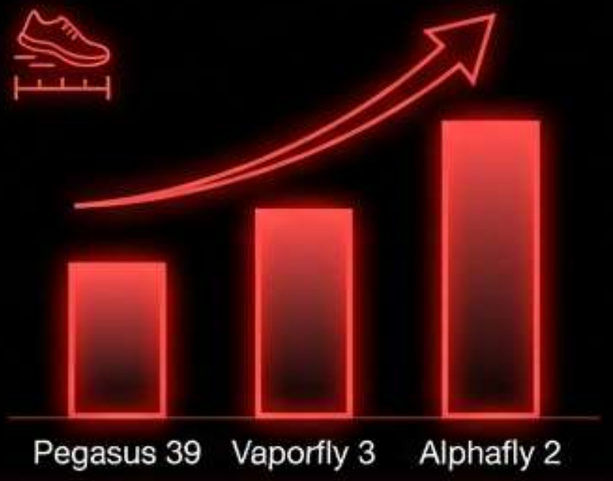

THE 3 MISSING METRICS

GEAR PERFORMANCE IMPACT

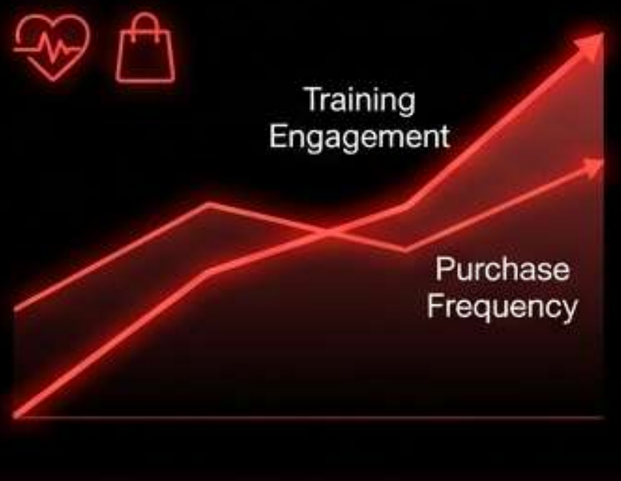

Correlation between shoe choice and race times

PRODUCT USAGE TRACKING

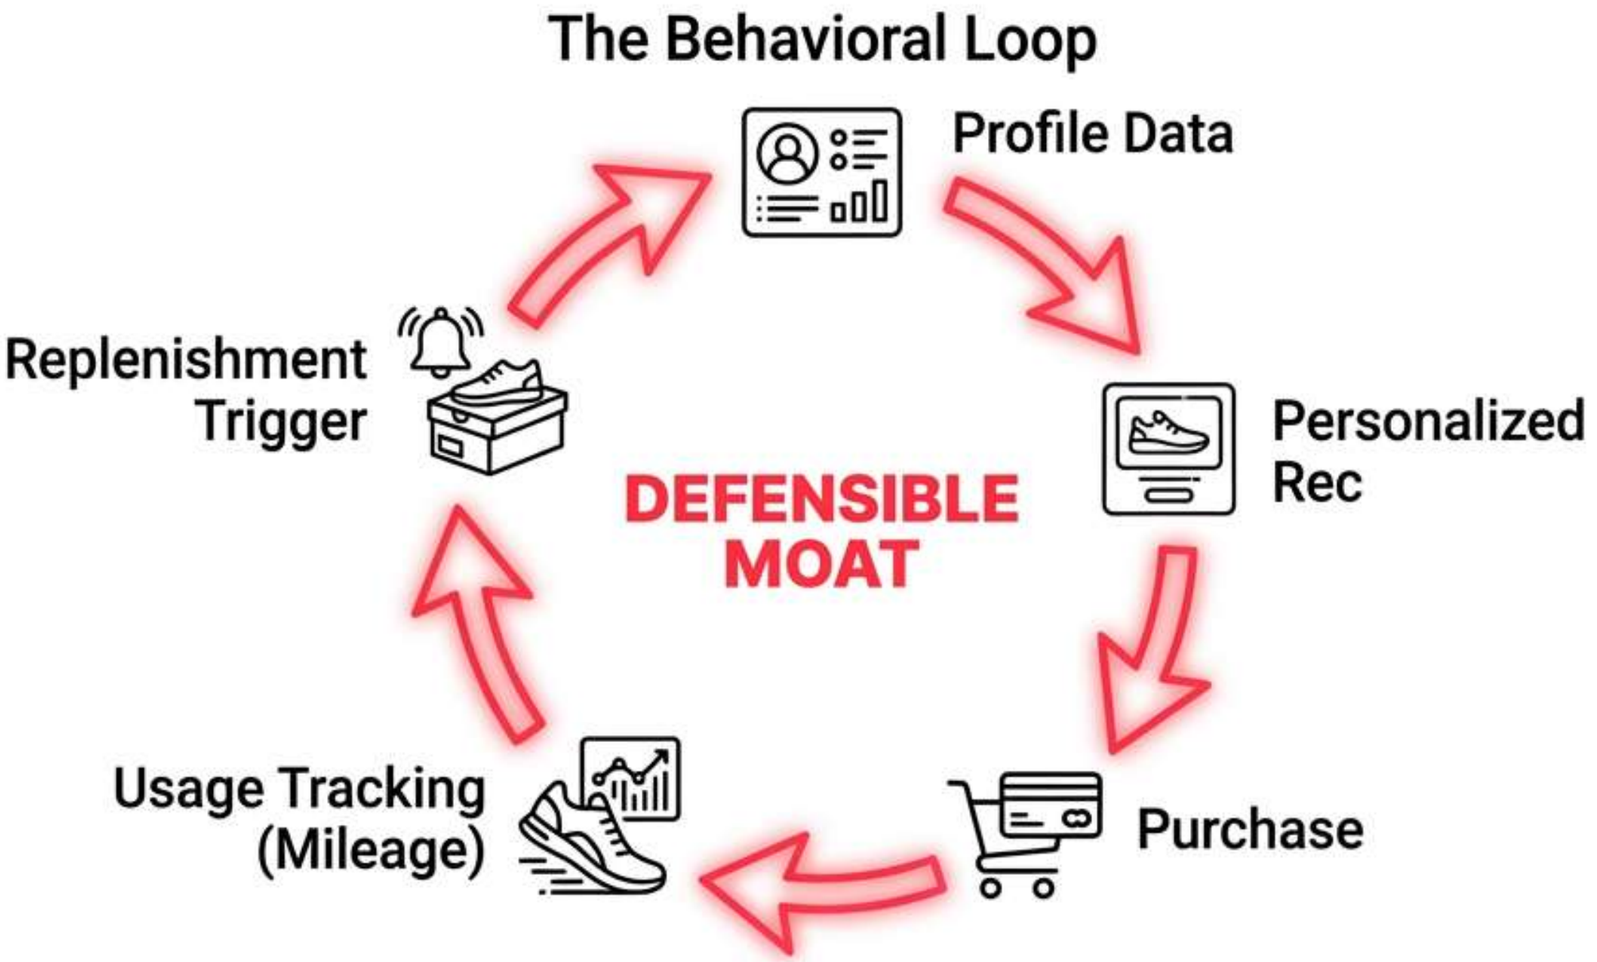

Average KM per shoe before replacement

ATHLETE RETENTION INDEX

Training engagement + Purchase frequency

BUSINESS MODEL SHIFT

Mileage tracking shortens repurchase cycles by 15–30%

THE UNCOMFORTABLE TRUTH.

In emerging markets, big brands move slower on deep personalisation. That gap? That's where insurgent brands are born.

THIS IS NO LONGER A TEARDOWN.
IT IS A STRATEGIC ENTRY BLUEPRINT.
